Safe | Secure | Sustainable

## Bespoke sterilisation trays

Visit us online at [altomed.com](https://altomed.com)

# Ultimate instrument protection throughout the entire process

Microwash® trays are 100% bespoke to your specific requirements, ensuring optimal protection, efficient reprocessing and compliance with ISO 17664 sterilisation standards.

Made in the UK

# Why choose Microwash®?

1

## Enhanced instrument protection and sterilisation

- Instruments are securely held in place for optimum reprocessing.
- Reduces the risk of instrument damage, needle-stick injuries, and handling errors.
- No need to transfer instruments to a wash basket, improving turnaround time.

2

## Improved organisation and workflow

- Standardised instrument set layouts simplify identification and counting.
- Each tray includes an inventory checklist and visual placement sheet for easy reference.

3

## Long-term cost savings and sustainability

- Durable tray construction reduces ongoing financial and environmental costs.
- Increases instrument life expectancy and minimises need for repairs.

4

## Fully customised to your needs

- 20+ years experience and over 3,000 unique layouts designed.
- Accommodates all instrument manufacturers and subspecialties.
- Made-to-measure design for delicate devices.

### If your needs change, don't worry!

Our reconfiguration service allows you to update your tray layout to accommodate new instruments and workflows.

Also available from Altomed

# Q-rinse system

## Improving reliability and compliance

**Consistent and effective** – Ensures a standardised rinsing process for small lumened reusable instruments such as phaco handpieces.

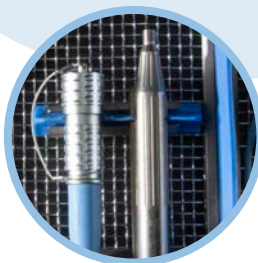

**Time-saving and efficient** – A superior alternative to manual syringing, reducing workload and enhancing workflow.

**Fast and automated** – 30-second automated cycle regulates the precise flow of fluid and air for optimal rinsing.

## Instrument repair service

- Comprehensive repairs for all brands of ophthalmic instruments including phacoemulsification handpieces and diamond knives.
- Sustainable solution extending instrument lifespan.
- Fast turnaround.
- No obligation quotation.
